DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 9-10 and 12-13 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,021,250 in view of Fujinami et al (5504585). Although the conflicting claims are not identical, they are not patentably distinct from each other because the difference between claims 9-10 and 12-13 of the present application and claim 1 of U.S. Patent No. 6,021,250 is that claim 9-10 and 12-13 further reciting that the multiplexed data are formed as separated packs, that is not recited in claim 1 of the U.S. Patent No. 6,021,250. However, it is noted that forming the multiplexed data as packs is well known in the art as taught by Fujinami (Fig. 3). Therefore, it would have been obvious to one of ordinary

Art Unit: 2616

skill in the art to modify claim 1 of U.S. Patent No. 6,021,250 with the teaching of Fujinami by forming the multiplexed data recited in claim 1 of U.S. Patent No. 6,021,250 as separated packs in order to easily identify and access the multiplexed data and to produce claims 9-0 and 12-13 of the present application.

Information Disclosure Statement

3. The information disclosure statement filed 11/28/2005 fails to comply with 37 CFR 1.97(d) because it lacks a statement as specified in 37 CFR 1.97(e) and lacks the fee set forth in 37 CFR 1.17(p). It has been placed in the application file, but the information referred to therein has not been considered.
